

## Light rail intersection work in your area from 3 February to 20 February 2017

In planning for Tomorrow's Sydney we are building a new light rail line to provide fast reliable public transport from Circular Quay, through the CBD, to Kingsford and Randwick via Surry Hills, Moore Park and Kensington.

### What we're doing in Kensington

ALTRAC Light Rail will start work at the intersection of Anzac Parade and Day Avenue from 3 February 2017.

This notification is for work taking place continuously between 3 February and 20 February 2017.

Work may at times be subject to further approval and work periods may, subject to weather or unforeseen circumstance, be extended by way of further notification to impacted stakeholders.

#### Work locations and activities

##### Site establishment and intersection work:

- Intersection of Anzac Parade and Day Avenue.

Work may also take place on cross-streets and side streets around the area.

#### Work times

- Work will be continuous **from 8pm, Friday 3 February to 5am, Monday 20 February 2017.**

This continuous work has been scheduled over the university holiday period to take advantage of the expected lower traffic volumes.

#### Details of work activities

**Site establishment:** includes installation of fencing and hoardings around the worksite, barrier installation, traffic signal work, changes to signage and line marking, lane closures and traffic changes.

**Intersection work:** includes track work (rail preparation

work, concrete pouring, rail delivery, rail/track installation, surveying, welding, saw cutting and surface finishing), drainage work, excavation, structural work, concrete pouring, heritage work and investigations, utility protection and relocation, road pavement work, kerb widening and reinstatement work.

**Equipment and vehicles:** includes radar detection, survey and monitoring equipment, flood lights, concrete trucks, vacuum excavation trucks, coring and drilling machines, saw cutters, road grinders, compaction equipment, generators, asphalt milling plant, jack-hammers, vibratory roller, water carts and traffic control vehicles. Not all equipment will be used for one activity.

### How will work affect you?

#### Traffic and pedestrian changes

For the latest information on traffic changes please visit [livetraffic.com](http://livetraffic.com) or download the Live Traffic NSW app.

The following changes will be in place during the work (see map):

- The right turn from Anzac Parade into Day Avenue will be prohibited. Vehicles will be detoured along Anzac Parade to Barker Street to continue their journey west.
- **From 8pm 3 February to 5am 11 February** the left turn from Day Avenue into Anzac Parade will be prohibited. Vehicles will be detoured via Houston Road and Barker Street.
- **From 5am Saturday 11 February**, the left turn from Day Avenue onto Anzac Parade will reopen.

Two traffic lanes will be maintained in each direction on Anzac Parade during day time hours. Additional lane closures may be in place at night. Construction speed limits may apply.

During the work cyclists will continue to travel along Anzac Parade with other traffic. Cyclists will be required to dismount at the end of the on-road cycleway and follow the general traffic detour.

Access to buildings, driveways and pedestrian footpaths will generally be maintained. Any interruption to property access will be discussed in advance with impacted stakeholders.

Where required, traffic management will assist motorists, pedestrians and cyclists to move safely around the work. Cyclists are recommended to use detours away from Anzac Parade, especially in the areas where construction has started.

### Public transport changes

**From 10pm Friday 3 February until 5am 20 February**, bus stops on each side of Day Avenue near Anzac Parade will be temporarily closed. Check signs at stops or visit [transportnsw.info](http://transportnsw.info) for details.

### Noise and dust

You may experience some noise and vibration during this work. Efforts will be made to schedule the noisiest work during the daytime and evening.

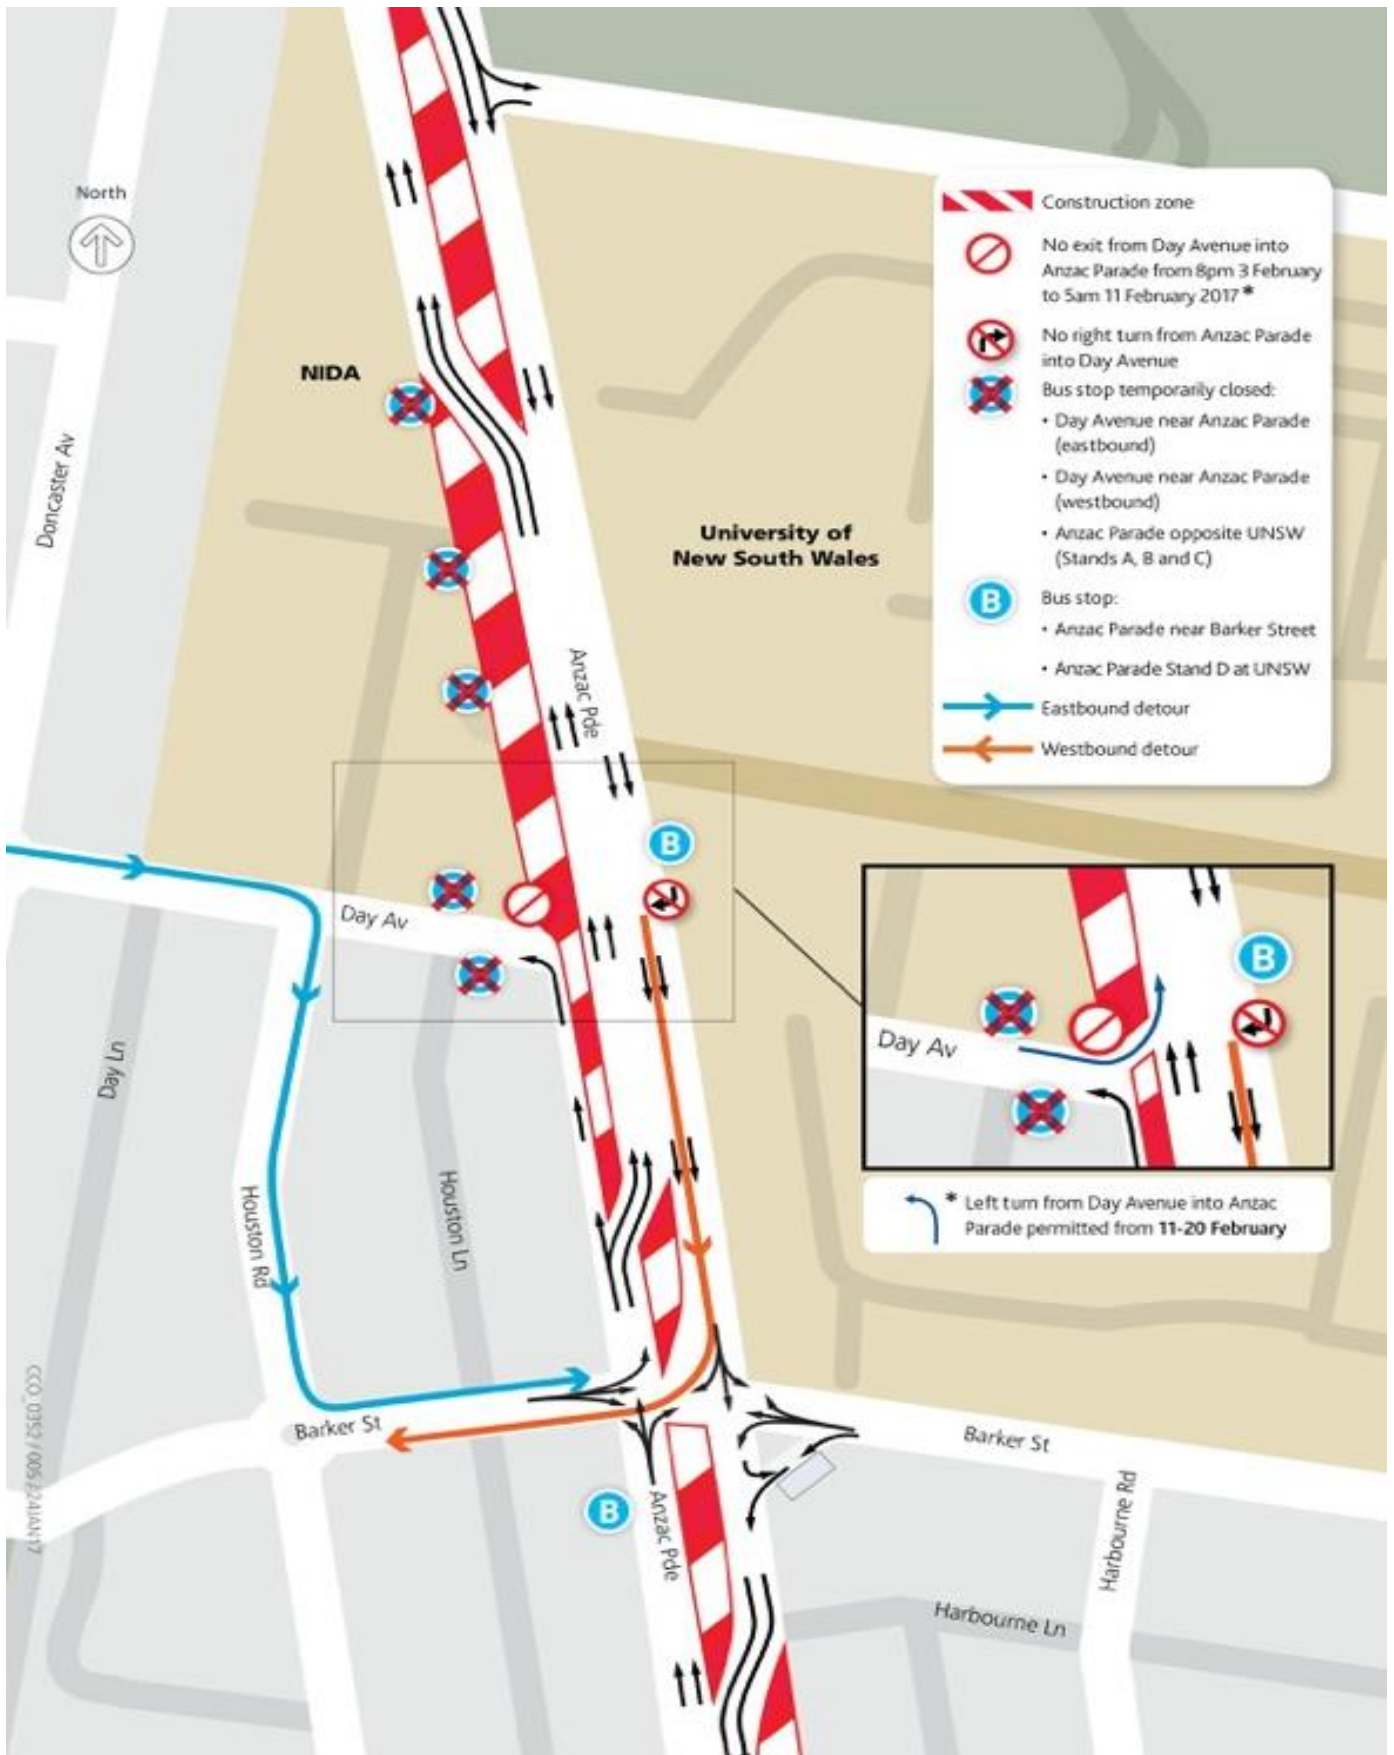

Noise monitoring will be conducted and, where practical, mitigation measures such as noise blankets will be used to minimise impacts as much as possible. Vehicles will be switched off when not in use to minimise noise. Respite periods will be provided for high noise work, such as saw cutting, jack hammering and rock breaking. Where required, any dust generating activities will be watered down.

Every effort will be made to reduce the impact to residents and businesses while work takes place.

### Keeping you informed

Please visit [sydneylightrail.com.au](http://sydneylightrail.com.au) for all current construction notifications and [mysydneycbd.nsw.gov.au](http://mysydneycbd.nsw.gov.au) for detailed maps.
