Notification of out of hours work – Randwick

In planning for Tomorrow’s Sydney we are building a new light rail line to provide modern, reliable and sustainable public transport that will transform services from Circular Quay and the CBD, to Kingsford and Randwick via Surry Hills, Moore Park and Kensington.

Standard work hours are Monday to Friday 6am to 6pm and Saturday 8am to 5pm. This notification is for approved work that falls outside the standard working hours. These works are carried out on these dates and times to minimise disruption to live traffic and to maintain the safety of construction works, residents, businesses and the general public.

Details of work activities

Work will take place from Sunday 1 April to Monday 30 April 2018. Work will be carried out from 7pm to 5am Sunday to Thursday nights, and from 8am to 5pm on Sundays. Work will only occur on Friday and Saturday nights where required and impacted stakeholders will be notified.

Work will be carried out at the following locations:

- Alison Road, between Darley Road and Wansey Road
- Work may also occur on nearby streets and cross streets (John Street, William Street, Cowper Street, Prince Street and King Street) as well as the intersection of Alison Road and Darley Road.

Work includes testing and commissioning of electrical services, concrete pouring, landscaping and installation of pedestrian fences, street light modifications, road pavement, kerb and footpath work, concrete cutting, road sawing and milling, potholing, excavation/ trenching, heritage work, utility investigation, vegetation work (includes trimming, mulching, relocation, planting and removal of shrubs or trees), electrical conduit installation, cable pulling, installation of stormwater pipes and pits, delivery and removal of oversized machinery and materials, substation construction and fit out, relocating and setting up traffic controls, line marking, signage and traffic barriers, installation and adjustment of traffic signals.

Equipment and vehicles for this work may include, concrete trucks and pumps, flood lights, vacuum excavation trucks, coring and drilling machines, excavators, compactors, cranes, saw cutters (road and brick), jack hammers, road grinders, tipper trucks, hand tools, water carts, semi-trailers, spray seal trucks, elevated work platforms, power tools, air compressors, traffic barriers and traffic control vehicles.

You may experience some noise and vibration during this work. High noise activities such as saw cutting and jackhammering will be completed by midnight. High noise activities will not take place for more than two consecutive nights in the same area. Mitigation measures such as noise blankets will be used to minimise impacts as much as possible. Vehicles will be switched off when not in use to minimise noise.

Traffic and pedestrian changes

Some side street parking may be temporarily removed at night where required for these works.

Work may involve lane and footpath closures and minor detours during these works. Some minor traffic delays may be experienced. Where required, traffic control will be in place to direct cyclists, motorists and pedestrians safely around the operations. Access for emergency services and local residents will be maintained at all times.
