Notification of testing and commissioning work – Randwick and Moore Park

In planning for Tomorrow’s Sydney, we are building a new light rail line to provide modern, reliable and sustainable public transport that will transform services from Circular Quay and the CBD, to Kingsford and Randwick via Surry Hills, Moore Park and Kensington.

Standard work hours are Monday to Friday 6am to 6pm and Saturday 8am to 5pm. This notification is for both daytime work and approved work that falls outside the standard working hours. Out-of-hours work is carried out on these dates and times to minimise disruption to live traffic and to maintain the safety of construction works, residents, businesses and the general public.

Details of work activities

Testing and commissioning work will continue from Monday 7 January to Thursday 7 February 2019. Work will progress on the overhead wire system, tram stops and underground cables along Wansey Road and High Street. The light rail vehicles will be tested within the Randwick Stabling Yard and along tracks on Anzac Parade at Lang Road and Alison Road to the Wansey Road intersection. Night work will normally take place between 6pm and 5am Sunday to Thursday and will only occur on Friday and Saturday nights when required. Affected stakeholders will be notified.

As part of the testing and commissioning phase, all lights have now been energised at the Randwick Stabling Yard. All lights will be tested using timers, operating from dusk until dawn.

Activities involve overhead catenary system work (pole/ wire/ cable works), underground cable pulling works, electrical equipment installation in pits, testing and commissioning activities, signal and communication installation works, light rail vehicle movement, traffic control signal testing, setting up traffic signals and signage.

Equipment and vehicles for this work include light rail vehicles, elevated working platforms, mobile winches, daymakers, trucks, hand tools, crane, traffic signage, traffic barriers and traffic control vehicles.

You may experience some noise and vibration during this work. Noise monitoring will take place during this period.

Traffic and pedestrian changes

Temporary lane closures along Alison Road and High Street and pedestrian detours may be in place during these activities.

Where required, traffic control will be in place to safely direct motorists, pedestrians and cyclists. Local stakeholders will be informed prior to work start.
