Notification of out of hours work – Randwick

In planning for Tomorrow’s Sydney we are building a new light rail line to provide modern, reliable and sustainable public transport that will transform services from Circular Quay and the CBD, to Kingsford and Randwick via Surry Hills, Moore Park and Kensington.

Standard work hours are Monday to Friday 6am to 6pm and Saturday 8am to 5pm. This notification is for approved work that falls outside the standard working hours. These works are carried out on these dates and times to minimise disruption to live traffic and to maintain the safety of construction works, residents, businesses and the general public.

Details of work activities

Work will take place from Sunday 26 November to Friday 22 December 2017. Work will be carried out from 7pm to 6am Sunday to Thursday nights, and from 8am to 5pm on Sundays. Work will generally not occur on Friday and Saturday nights.

Work will be carried out at the following locations:

- **Alison Road, between Darley Road and Wansey Road**
  Work may also occur on side streets (John Street, William Street, Cowper Street, Prince Street and Wansey Road) from Sunday to Thursday between 7pm and 5am.

- **Intersection of Alison Road and Darley Road**
  Work may also occur on King Street, Monday to Sunday between 7pm and 5am.

Work includes testing and commissioning of electrical services, concrete pouring, landscaping, installation of overhead wires and lights, kerb and footpath reconstruction, concrete cutting, road sawing and milling, potholing, excavation/trenching, heritage work, utility investigation, protection and relocation, vegetation work (includes trimming, mulching, relocation, planting and removal of shrubs or trees), electrical conduit installation, cable pulling, installation of stormwater pipes, road pavement work, delivery and removal of oversized machinery and materials, substation work and fit out (bricklaying, craning in concrete slabs, fence installation), relocating and setting up traffic controls, line marking, signage and traffic barriers, installation and adjustment of traffic signals.

You may experience some noise and vibration during this work. High noise activities such as saw cutting and jackhammering will be completed by midnight. High noise activities will not take place for more than two consecutive nights at the same area. Mitigation measures such as noise blankets will be used to minimise impacts as much as possible. Vehicles will be switched off when not in use to minimise noise.

Equipment and vehicles for this work may include radar detection and survey equipment, concrete trucks and pumps, flood lights, vacuum excavation trucks, coring and drilling machines, excavators, compactors, cranes, saw cutters (road and brick), jack hammers, road grinders, tipper trucks, hand tools, water carts, semi-trailers, spray seal trucks, elevated work platforms, power tools, air pumps and traffic control vehicles.

Traffic and pedestrian changes

Lane closures and pedestrian detours will be in place during these works. Traffic control will be in place to direct motorists and pedestrians safely around the operations. Diversions may also be in place for cyclists, which will be indicated with signage. Access for emergency services will be maintained at all times.
